

Patient-impact decision checklist

Bridging the Gap: From Innovation to Patient Impact · Dr Vikas Kumar Jha · KIIT University, Bhubaneswar

For every “Not yet”: name the owner and the condition for proceeding.

Stage	Patient’s question	Ask before proceeding	Evidence to see	Owner	Go?
Need	“Will it help me?”	Is the need validated with patients and clinicians? Is the need statement solution-neutral?	Need statement; observation notes		☐ Yes ☐ Not yet — condition:
Evidence	“Is there proof, for people like me?”	Does the evidence match the exact claim, users and device version? What is demonstrated, reported, planned?	Protocol; subgroup results; failure modes; version log		☐ Yes ☐ Not yet — condition:
People	“Can I freely refuse?”	Is consent independent of any dependent relationship, in the person’s language? Are conflicts disclosed and managed?	Consent form and process; COI management plan; CTRI entry		☐ Yes ☐ Not yet — condition:
Permission	“Is it allowed for this use?”	Which CDSCO permission covers this use: test licence (MD-13), clinical investigation (MD-23), manufacturing licence?	Class; licence or permission; registered ethics committee approval		☐ Yes ☐ Not yet — condition:
Access	“Can I afford and use it?”	What is the total cost of use? Who is excluded by its demands (vision, dexterity, language, power, phone)?	Cost of a full course; inclusive-design audit; service plan		☐ Yes ☐ Not yet — condition:
Safety	“Who answers later?”	Who records, reports (MvPI) and acts on harm? How are updates validated, released and rolled back?	Complaint log; MvPI route; change-control and rollback plan		☐ Yes ☐ Not yet — condition:

My commitment

Before _____, I will _____.

Owner: _____ I proceed only if _____.

Label every claim

Demonstrated **Reported, preliminary** **Planned** **Not established**

India anchors: MDR-2017 (MD-13 test licence; MD-22/23 clinical investigation; MD-5/MD-9 manufacturing) · ethics committee registered with CDSCO · CTRI · ICMR 2017 · MvPI 1800-180-3024 · UCMPMD 2024 · DPDP Rules 2025

Workshop synthesis adapted from Stanford Biodesign (need statements, Principled Decision-Making), Harvard MRCT Center (diversity, plain-language consent), Cambridge Engineering Design Centre (inclusive design), IDEAL-D, Declaration of Helsinki (2024), ICMR (2017) and CDSCO guidance. Not a regulatory checklist or certification. Checked 7 October 2026.
