- Yang X, He H, Ye W, Perry TA, He C. Effects of pulsed electromagnetic field therapy on pain, stiffness, physical function, and quality of life in patients with osteoarthritis: a systematic review and meta-analysis. *Phys Ther*. 2020;100(7):1118–1131. <https://pubmed.ncbi.nlm.nih.gov/32251502/> — Slides: 13, 27

Case material and media (supplied)

- Ahilaya Biomedicals Pvt Ltd. FoGO BIRAC BIG project presentation (supplied, 2026): alpha prototype (3 iterations, Jan 2024–Jun 2025); subject-wise F1 0.83–0.85 and cross-dataset F1 0.74–0.80 on Daphnet, CuPiD and Turning-in-place; 0.15–0.18 false alarms per minute; vibrotactile bench study; IEC 60601-1-2 EMC pre-compliance (Jul 2026); CDSCO test licence Form MD-13 for 25 units (10 Aug 2026); clinical proof-of-concept planned at AIIMS Bhubaneswar; 12 s demonstration clip (volunteer, simulated freeze, face obscured). Project reported; not peer-reviewed. — Slides: 1, 8, 9, 11, 17, 18, 19, 21, 23, 26, 27
- Swa knee_Leaflet.pdf. Supplied product material: 45-minute daily sessions over 45 days (illustration of time burden, not a prescription). — Slides: 12
- Swayogya Rehab Solutions. SwaKnee evidence page: company-reported comparative 45-day study, device n=40 vs comparison n=42, ≈32% vs ≈14% average VAS pain reduction from baseline (as summarised in the original deck). <https://www.swayogya.in/evidence.html> — Slides: 13, 20, 26

- Swayogya website assets (ivikasjha/swayogya_website): product photographs and three 'How to use' step videos, edited into a 20 s silent clip with step captions; no faces shown. <https://www.swayogya.in/product.html> — Slides: 1, 12

Notes on attribution

- *Biodesign: The Process of Innovating Medical Technologies* is Stanford Biodesign content published by Cambridge University Press; it is cited as Stanford material.
- *Engineering Better Care* (2017) was published by the Royal Academy of Engineering, Academy of Medical Sciences and Royal College of Physicians; its working group was chaired by Prof P. John Clarkson (University of Cambridge), and Cambridge's Centre for Engineering Better Care maintains the toolkit.
- The IDEAL and IDEAL-D frameworks are Oxford-led (IDEAL Collaboration), not Cambridge.
- FoGO results are project-reported (Ahilaya Biomedicals); SwaKnee results are company-reported (Swayogya); neither has been independently verified or peer-reviewed. No cited institution has evaluated or endorsed either device.
